

The 59 nonprofit members of the Association of Independent Colleges and Universities in Massachusetts (AICUM) produce a significant economic and social impact within the state of Massachusetts. This comes from member institutions' annual operations and capital investments, as well as from student and visitor spending and the multiplier effect of the enhanced earnings of alumni living in the state. Member institutions also enhance the economic competitiveness of their regions and invest in communities throughout the state. In all these ways and more, AICUM member institutions, while private entities, deliver substantial benefits to the state and its taxpayers.

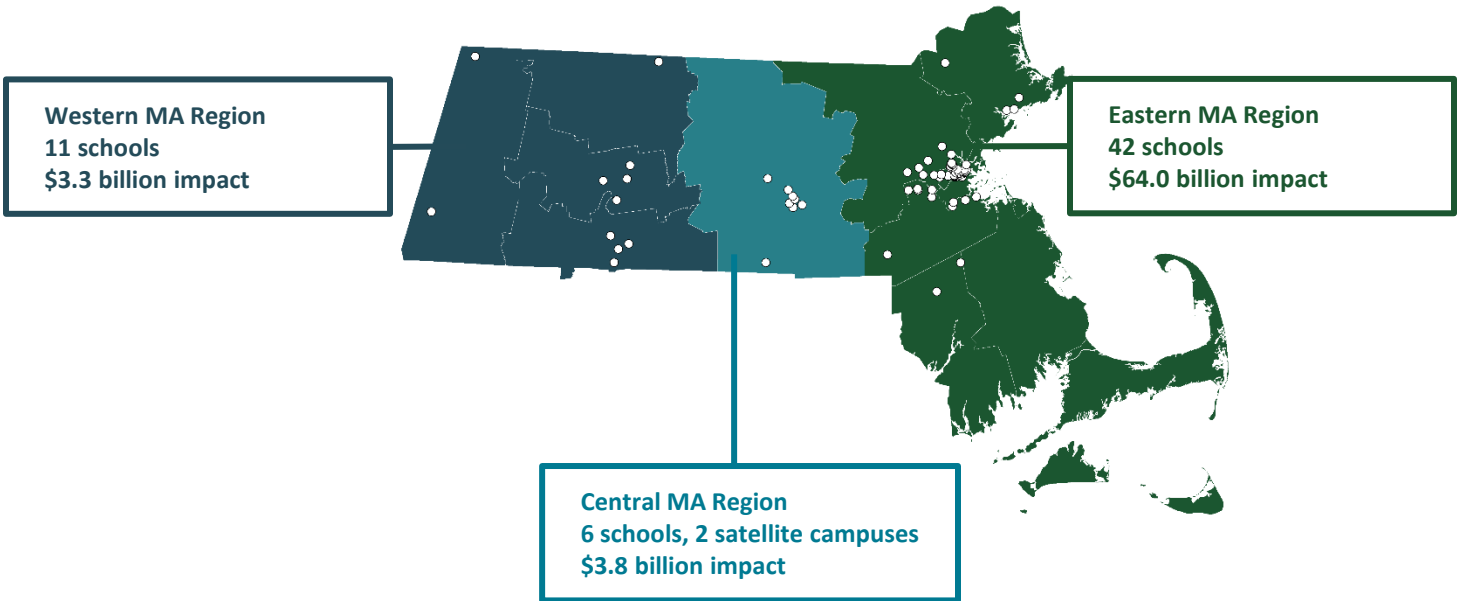

AICUM Members Generate Outsized Economic Impacts in Massachusetts
